### LABORATORY TEST REPORT

Regn Date : 08/09/2021 14:58 Sample Collection : 08/09/2021 15:04

Name : MR. ASHIRTH KOTHA Print Date : 09/09/2021 11:57

Regn No : **742156578** Age / Sex : **20 Years** / **Male**Ref By : SELF Regn Centre : Botanical Garden-74

Sample Type : Swab Ref no. : S118606540693

# COVID -19 TESTING - SARS -CoV-2 RNA

**TEST NAME** 

RESULT

SARS-CoV-2 (RdRp gene)

NEGATIVE

Method: Real Time RT-PCR

INTER	PRETA	TION:

Result | Remarks

'

Positive | RNA specific to SARS-CoV-2 Detected.

Negative | RNA specific to SARS-CoV-2 NOT Detected.

-----

#### Limit of Detection:

-----

• Analytical lower unit of detection <150 viral genome equivalents/mL

#### Comments:

-----

- Covid 19 Qualitative RT PCR test is an in vitro qualitative PCR assay for the qualitative detection of Novel Corona Virus 2019 in respiratory specimens
- Test is conducted on Nasopharyngeal swab/ Oropharyngeal swabs and other respiratory specimens collected in viral transport media.
- Detection of confirmatory(RdRp) genes indicates presence of SARS-CoV-2 RNA in the specimen tested.
- Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for
  patient management decisions. They must be correlated with clinical observations, patient history
  and epidemiological information.
- Mutations or polymorphisms in the primer and probe binding sites, presence of PCR inhibition due to host factors may also cause false negative results.
- Fresh sample for RT PCR can be considered after a gap of 2-4 days if there is a strong clinical suspicion/contact of Covid 19 patient
- · Repeat sampling and testing of lower respiratory specimen is strongly recommended in a severe or progressive disease.
- This test is a qualitative assay and does not quantify viral load. Various host factors, variability in sample collection / site and techniques used by the laboratories can affect CT values. Therfore, CT values are not an absolute indication of viral load and should be interpreted with caution.

## Note:

- ICMR-Registration Number: VIJAY001
- COVID-19 test is conducted with a kit approved by ICMR/CE-IVD/US-FDA.
- Kindly consult Referring Physician/Authorized Government Hospital for appropriate follow up
